

Re: National Save for Retirement Week. What Are Your Plans?

Congress has officially endorsed October 19-25, 2014, as National Save for Retirement Week, which is a national campaign designed to educate Americans on the importance of saving and investing for the future.

Retirement—is something we all think about, whether it's a long way off or right around the corner. Each of us has our own idea of what retirement means. But one thing is universal—to have the retirement we want, we need to plan and save for it. Use this week to prepare for the future you.

Your mission should include enrolling in your employer's retirement plan, if you have not already done so, or increasing your contributions if you are already enrolled. To assess your retirement savings, enroll, or make changes, log on to www.planconnect.com.
